FASHION DESIGN

Fashion designing is more than just starting a trend it is a fearless artistic expression that leaves an impression for years to come. At INIFD, we coach all aspiring fashion designers to channel their creativity to design the fashion that defines the future. I Year Foundation Program With a vision to help you apply the elements and principles of design, our One Year Foundation Program provides you with an opportunity to get hands-on experience in line and design through various projects. Our engaging modules/ course-ware like Fashion Illustration, study of Textiles & Art, Techniques for Fabric enhancement, basics of pattern drafting and garment construction will enable you to venture into kids and women's fashion. Upon the successful completion of the first year course, students will have a complete understanding of Kids wear and introduction of Womenswear.

ONE YEAR CERTIFICATE PROGRAM

Fashion Foundation

Understand the basics of design and the fundamentals of fashion and design theories. This subject will empower you to appreciate fashion design by exploring and applying the various elements and principles of design including interaction and their attributes. The study of different elements and principles of design along with fashion forecasting will be an integral part of this course to help you build a strong foundation.

Textile Fundamentals

Learn the intricacies of different fibres, yarns, fabrics and the processes and methods involved in the construction of textiles. This subject provides a comprehensive overview of all major textile processing steps and instils a solid, working knowledge of terminology..

Elementary Tailoring Techniques

An introductory subject, this subject includes the techniques and basic construction details for women and kids clothing of different age groups right from an infant to teenager. The study of pattern making and garment construction techniques for kids and women clothing will form the basis of this course.

Fashion Figure Drawing

This subject will lay the foundation for every fashion designer's work as it helps a designer to come up with original ideas. This subject will introduce you to the basics of kids and female illustrations and train you to use different drawing tools and mediums of colour. This course will help you develop an understanding of figure proportions of kids and women.

Indian Art and Appreciation

This subject aims to inculcate awareness and appreciation of art, culture and clothing of different states of India.

Surface Ornamentation

Understand the different techniques used to enhance fabric with this subject. This course will help you learn the different types of machine and hand embroideries.

TWO YEAR ADVANCE CERTIFICATE PROGRAM

Learn the basics of research methods and design processes with hands-on experience that prepares you to apply these tools in real life situations after you successfully complete Two Year Advance Program. Stay a step ahead of the industry standards by challenging yourself to draft and construct tailored garments by learning the correct technique of handling fashion fabrics and proper utilization of industrial equipment. This course is the best fit for all aspiring Research Assistants, Freelance Designers, Pattern Makers and Sourcing Assistants.

Study Plan

Study and Structure of Apparel Industry

This course is designed to provide you with an understanding of the structural mechanism of any apparel industry. The study of role, function and importance of different departments of an apparel industry will form the basis of this course.

Technical Fashion Sketches

The study of stylized croquis will form the basis of this course. This subject will help you learn to illustrate male and female croquis.

Drafting and Pattern Making

In this subject, you will learn pattern development and various draping styles for men and women.

Advance Tailoring Techniques

This subject will equip you with the knowledge of women and men clothing construction.

Textiles and Embroidery

This subject will teach you all about the Indian Traditional Textiles- embroideries, their motifs and techniques.

Design Process

The subject will expose to the various processes involved in design development and also the basics of research and their tools.
